ENERGY
EFFICIENCY
PROGRAM

Qualifying Purchases

The City and Kansas Power Pool offer rebates & incentives for the installation of new high efficiency electric products including:

- Air Conditioners
- Electric Heat Pumps
- Water Heaters
- Old Refrigerator Buy-Back Program
- Electric Vehicle Level 2 Charging Unit

The City, as a governing member of the Kansas Power Pool, strives to deliver the most affordable and efficient power supply to its member cities. Energy conservation coupled with increased efficiency in energy usage can help us meet the growing need of the communities we serve. To help with this effort, The City and Kansas Power Pool are proud to offer the following energy programs designed to encourage efficiency through energy conservation and increased customer awareness.

Commercial Customers

Commercial customers can also take advantage of this program up to \$500.

Commercial customers may participate in the Energy Efficiency Program on items like air conditioners, heat pumps, and ceiling insulation. Each commercial application is taken on a case by case basis and awarded up to \$500.

Other Services

Kansas Power Pool offers general energy consulting and support services

- Purchase and installation of a new high efficiency heat pump(s) in a new residential structure; or
- Replacement of existing standard air conditioner with a heat pump. Natural gas or propane may be used only as a supplemental source.
- Qualifying equipment includes new electric heat pumps greater than or equal to 15 SEER.
 - This equipment must be inspected by the City before the application is approved. KPP will determine whether the equipment meets the program qualification.
